

NEW! DMT CERAMIC SHARPENERS

Now, DMT® adds a new dimension to their sharpening systems with the introduction of an assortment of precision engineered, unbreakable ceramic and diamond-ceramic sharpeners. DMT's new line incorporates the patented CeraFuse™ process to transform the surface of aluminum to an extremely hard, dense aluminum oxide that has the same properties of solid ceramic materials. The new ceramic and diamond-ceramic sharpeners are unbreakable, light, fast to use, wear resistant, will not rust and need no lubricant for the sharpening process. These ceramic and diamond-ceramic sharpeners provide the ultimate in edge polish. DMT® is offering this breakthrough technology in four models to tackle a multitude of sharpening tasks.

The #CFSK Diafold Ceramic Serrated Knife Sharpener was developed from the famous DMT® Diafold® diamond sharpener models that have become part of everyman's cutlery maintenance program. The ceramic version offers a 4.43" cone-shaped sharpener and DMT's practical, self-stowing, folding design. It is remarkably light—only 1 ounce.

A great addition to the collection is the #CDT62 Diamond-Ceramic Triangle Sharpener featuring a 25 micron Diamond Flexi-Sharp® surface that is just one facet of a triangle of sharpening surfaces. This sharpener also offers the utility of 3 different radiused sharpening edges and a groove for fishhooks. It adapts to virtually any sharpening task presented by woodworking gouges, serrated knives or shaped tools.

DMT CDT62 - Triangle 6 in 1 Tool

This sharpener also offers the utility of 3 different radiused sharpening edges and a groove for fishhooks.

Item #	Description	Grit
DMT-CDT62	Diamond Ceramic Triangle 6 in 1 tool: Handle: 4-1/16" (119 mm) Flat sides: 6" (152 mm) Radii: 0.063" (1.60 mm) 0.125" (3.18 mm) 0.188" (4.78 mm)	Coarse/Fine

Diafold Knife Sharpeners

Item #	Description
DMT-CFSK	Diafold® ceramic serrated knife sharpener hones small gouges and fixed or folding knives. 4" ceramic rod, 9 1/2" (240 mm) open, 5" (125 mm) closed.
DMT-CFWE	NEW! 4-1/3" x 7/8" x 1/4" Double Sided Diafold with Extra Fine Grit on one side, ceramic on the other

DMT Dia-Paste™ Diamond Compound

Use to obtain a highly polished or mirror finish on fine woodworking tools like chisels and plane irons. Packaged in an easy-to-use 5 gram syringe.

Item #	Description
DMT-DP6	6 micron, copper color
DMT-DP3	3 micron, green/yellow color
DMT-DP1	1 micron, light gray color
DMT-DPK	Kit of 3 Dia-Paste tubes (Includes: DP1, DP3 & DP6)

Ceramic Sharpeners

- *Unbreakable*
- *Made in the U.S.A.!*
- *Versatile*
- *Compact design*
- *Light weight*
- *Will not rust*
- *Multi-task sharpeners*
- *No lubricant needed*

Ceramic Triangle Tool (Chisels not included)
