**Wood Tech Hydro-Loc  
 Super Cylinder Cutterhead**
*Constructed Specifically for High Production Applications*
**Features and Benefits:**

- Newly designed cylinder enables moulder heads to be run on arbors with key ways and slightly undersized arbors (up to 0.002") with no distortion
- Cylinders offer increased life expectancy compared to other cylinders available in the industry.
- Easier installation and removal
- Greater resiliency to metal fatigue due to thinner body wall
- Easy access to pressure release and grease fittings
- Standard inch and metric fittings available.
