

## Bardo Flex Saw Polishing Wheels

Bardo Flex Saw Polishing Wheels are polyurethane foamed wheels that are impregnated with either Aluminum Oxide or Silicon Carbide abrasive grain. They are available

in 24, 40, 54 grit size in 6", 8", or 10" OD's for both applying satin finishes to carbon steel circular saw blade faces and re-facing of saw blade faces.

These are generally used on machinery where the circular saw blade spins on a table as the wheel is presented to the saw blade face, as it spins on a fixture, the wheel traverses across the blade either from the center hole towards to sand blasted finish at the edge, or from the outer edge to the center hole.

Bardo Flex saw polishing wheels are absolutely **BEST USED IN WET OPERATIONS**. They have successfully replaced 3M DBX Finishing, Artifex and Carbo-cut saw finishing wheels.

Bardo Flex Saw Polishing Wheels

## Availability Chart for Saw Polishing Wheels

SIZES	WIDTHS
6 x 1 x 1-1/4", 8 x 1 x 1-1/4", 10 x 1 x 1-1/4"	1-1/2" and 2" widths available
