

FeedWorks™

We're "On-A-Roll!"

Hub and tire assembly

FEEDWORKS™ FEED ROLLER SYSTEMS

Wood Tech Enterprises offers feed rollers for most any woodworking application and machine. Our own Honor Roll™ brand offers reliability, long life and an economical solution to material feeding.

What's all the Hub about? Our reusable hub and replaceable drive tire assemblies are easily mounted for the most economical use on your machine.

Our Tires Won't give you the Slip - These high traction tires use the latest elastomer technology that solves traditional problems such as raised grain, slippage, marking and pre-mature ware.

Fed up with your Rollers? - Improvements include better abrasion resistance and higher tear strength which leads to longer lasting tires.

Earning high marks in Non-Marring - Our specially formulated tires won't leave marks like steel or rubber rollers.

More Grip—Less Gripe! - Reduce your reject figures. Make better use of time and money.

Helping you to get RE-tired! - Your in-house tire replacement means less down time and higher productivity. Economical replacement tires lower your overall inventory costs.

FEED ROLLER SERVICES

Resharpener and Recovering of Feed Rollers

Wood Tech specializes in the service of resharpener your helical metal feed rollers (saw tooth design) for most moulders (page 152). This includes, Weinig, Wadkin, SCM, Diehl and others. This allows you to recognize substantial savings over the purchase of new feed rollers. Some rollers are not able to be sharpened. Please note, pricing may vary due to the condition of your rollers. Because we are a feed roller manufacturer, we can fabricate custom rollers to most any size.

We can also recover worn feed rollers for moulders, power feeders, and other machinery. Custom feed rollers are available upon request. Call us to discuss your particular application.

WILLIAMS & HUSSEY FEED ROLLERS

Wood Tech offers William & Hussey feed rollers in two hardnesses.

The Green 85 duro lasts longer while the Yellow 70 duro provides better grip.
