

METAL ROLLERS

Wood Tech is now producing "Old-Style" Helical Feed Rollers!

Wood Tech now offers a helical, ground steel, tooth-feed roller. This hard-chrome covered feed roller offers maximum life and can be resharpened with ease. The company carries steel rollers for Weinig, SCMI, Wadkin and other manufacturers, as well as replaceable urethane rollers and re-usable metal hubs for most machines.

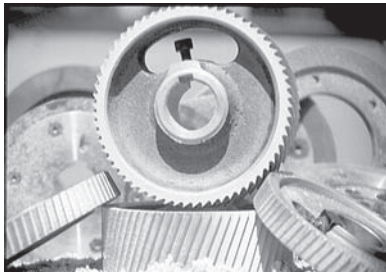

Our rollers are:

- Hardened and coated with satin finish chrome for longer life and better grip.
- Easily resharpened for about half the cost of a new roller, while still providing longer run life.
- Manufactured for Weinig, SCMI, Wadkin, Diehl and others

Weinig Steel Feed Rollers

140mm Outside Diameter
