

AutoTemp 2000 - Template Making System

It's everything you need to cut perfect templates - all in one low cost package.

The AutoTEMP template making system makes the template making process quicker and easier than ever.

With two different machines to pick from, the AutoTEMP CNC Router is the perfect machine for template making.

When combined with our AutoTEMP controller software, custom designed for template making, you have a

system that will provide you with accurate, ready-to-grind templates, time

after time. Now you can watch a video clip of the machine cutting a template!

This system provides the following:

- AutoTEMP CNC Router
 - 8" x 12" & 11" x 13" work areas.
 - Custom Clamping system - eliminates template distortion
 - Automatic router switch - switches router on when cutting
 - High speed 24000 rpm spindle
 - Built in controllers with onboard memory
-
- AutoTEMP CNC Router • TurboCAD
 - All WM Profiles predrawn in CAD Scanner
 - Windows 95/98 Control Software including full CAM program
 - Full length, multi-size clamping system
 - High Speed Router • Automatic Router on/off
 - Toll Free Technical Support

Visit us at www.woodtechtooling.com to see a demo video of this machine in action!

Now you can make your own Pressure Shoes!

to have a pressure shoe contoured to match the profile... So why don't more people do it?? The answer is obvious, cost or time involved.

Now there is no reason for not having a counter profile pressure shoe. Not only does the AutoTemp Template Making System make perfect templates, now it makes perfect

Everyone knows that the best way to prevent chatter marks in a profile is

pressure shoes. What is even better is that it works from exactly the same drawing you used for the template. Just finish cutting the template, slide the clamping system out of the way and insert the block, insert the correct cutter in the router and enter the 3 or 4 parameters for cutting the shoe and walk away. While you are grinding the knives, the machine is making your perfect pressure shoe. By the time the knives are ready, the pressure shoe will be ready too, matching the template, knives, and original wood sample perfectly.

We sell the AutoShoe program as part of the complete system including the clamping, bits and everything you would need to start making custom pressure shoes. The system cost depends on the machine you currently are using.

The AutoShoe program is an integrated part of the AutoTemp program. To have the AutoShoe program, you must have the AutoTemp program.
