

TWO HEADS ARE BETTER THAN ONE!

Looking for XS, Dual Angle
Cutterhead Range,
Straight Bore?

The *XS Range* combines the versatility of two cutting angles with the economy of purchasing only 1 head. Opposing pockets of 12° and 20° ensure you have the optimum cutting angle for both hardwoods and softwoods. Steel filler bars (page 98) are available for balancing non-cutting pockets. XS Dual Angle Cutterheads are suitable for all moulders.
