

INSERT CABINET SET

RP1000 & RP2000 Panel Raising Systems

Freud's now has a revolutionary system for making cabinet doors. This system combines the flexibility of standard insert tooling with the performance of resharpenable Micro-Grain Carbide Knives.

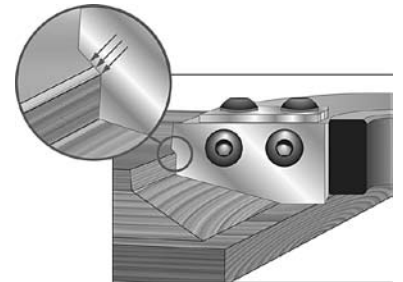

- Over 10 different styles of raised panels for cabinet doors
- A fraction of the cost of fixed cutters.
- Specially designed raised panel knife leaves cross grain smooth and splinter-free
- Manufactured out of a high grade aircraft aluminium.
- Anti-Kickback Design
- Creates Splinter Free Cuts
- Packaged in a sturdy case for convenient storage.

The basic system: RP1000, consists of the cutterhead only. Profile knives can be purchased separately. The RP2000, contains the cutter head, straight profile back cutter RP-OPS, and 5 sets of profile knives for 5/8" stock and 3/4" stock when using the back cutter. This raised panel cutter system can be used with the Performance System® Rail and Stile Cutter or with standard fixed wing rail and stile cutters.
