

## INSERT CABINET SET

### RS1000 & RS2000 Rail and Stile Door Systems

Freud's now has a revolutionary system for making cabinet doors. This system combines the flexibility of standard insert tooling with the performance of resharpenable Micro-Grain Carbide Knives.

- Over 18 different styles of cabinet doors at a fraction of the cost of fixed cutters.
- Eased panel slot edges to prevent splintering and improve finishing
- Zero down time to switch from the moulding cut to the cope cut
- Matched reversed sets with profiles that match even after resharpening.
- Packaged in a sturdy case for convenient storage.

The RS1000 set contains both cutter heads, groovers and knives RS-K for cutterhead RS-R. Profile Knives can be purchased separately. The RS2000 contains everything in the RS1000, plus nine different pairs of profile knives. Both sets come with a sample of a rail and stile and complete manual for easy setup. Additional heads can be purchased separately.

PART NO	DIA.	WINGS	BORE	GROOVERS	KNIVES
FRD-RS-S (RS1000)	4-7/16"	2	1-1/4"		RS-L
