

Custom Made Window and Door Tooling

Stark specializes in insert tooling systems for quality production of window and door parts.

- We communicate directly with our customers to create tooling that satisfies their production and quality needs.
- We interface with new machinery manufacturers to ensure proper design.
- All tools are engineered for optimum performance by experienced technicians.
- Our designs follow strict European safety standards.
- We furnish tool drawings and performance data with all quotes.
- We supply set-up data including radial and axial constant dimension, safe rpm and feed rate with all tooling orders.
- Our final drawings include a replacement parts list all assembled in a notebook.
- Our tools are manufactured to ISO9001 standards.
- We use standard components which are readily available.
- Tool finish and laser engraving are the best available.
- All tools are shipped assembled with knives.
- Stark Custom Tooling is guaranteed for Quality and Performance
