Precision Swiss insert tooling for:

- Moulders
- Planers
- Shapers
- Profilers
- Jointers

Features & Benefits:

- Reversible knives - reduced downtime
- Constant cutting circle-repeatability + or - .00"
- Solid aluminum alloy construction-allows high speed application
- Advanced head design-allows machine to run quieter
- Knife protrudes .060" above cutterhead-maximum safety and performance
- Centrifugal wedge clamping system-safety and easy change over.
- Knives available in H.S.S. 18% tungsten or solid carbide-longer knife life
- Knives change (radially) - quicker change over
- Fixed knife positioning centered on rib of body-no adjustment.
