

TERSA® Planing Technology For Planers and Moulders

- Knife change in seconds - requires no technical skills - just set it and forget it!
- Knives clamped by centrifugal force and gib wedges - no screws
- No knife adjustment needed, maintains constant cutting circle
- Reversible knives in chrome steel, HSS, M42 and solid carbide
- Resharpener of HSS and solid carbide knives available
- Easy Maintenance
- Less Power Consumption
- Low operation noise
- Knives can be easily changed while on machine
- Standard bore heads or arbored heads available
- Useable on all machine types

Revolution 2000 is the new TERSA cutterhead with centrifugal clamping of the knives. R2000 permits higher RPM and consequently increased feed and improved cutting quality. The center steel sleeve provides optimum stability and allows multi-purpose use of the TERSA cutterhead.

TERSA R2000 is revolutionary. The new design can offer better performance and increased productivity on all machine types.

All R2000 Heads have a 30° Hook Angle and come filled with HSS knives.

Part #	Outside Diameter	Cut Length	Bore Sizes
TER-198220	125mm	100mm	40mm
TER-198221	125mm	100mm	1-1/2"
TER-198245	125mm	150mm	40mm
TER-198246	125mm	150mm	1-1/2"
TER-198285	125mm	230mm	40mm
TER-198286	125mm	230mm	1-1/2"
TER-198326	140mm	100mm	1-13/16"
TER-198361	140mm	150mm	1-13/16"
TER-198406	140mm	230mm	1-13/16"

Other sizes and types of heads are available from stock.

Tersa offers the ability to make quick, easy knife changes.
