

TG25 FINGER JOINTING SYSTEM

- *The Ultimate 10 MM System for Hardwoods*
- *High Performance*
- *Low Operating Cost for Grecon Dimter, OMGA and other popular machines*

- The cutterheads are made of standard stacked sections
- You can add or remove sections to change stack height
- Sections are interchangeable from right to left

- The precision machined sections require no spacers
- No requirement for numbered sets
- Positioning pin correctly aligns sections

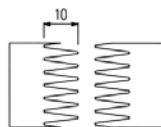

- Our precision knives are solid carbide
- Knives can be resharpened up to 15 times
- The unique four point knife pocket anchors the knife solidly for zero movement
- One screw is required to secure the knife

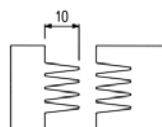

- Open Staggered design ensures excellent chip discharge.
- Faster Feed Rates.
- Works equally well in hardwood and softwood.

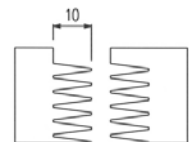

Three Types Joints Are Available:

Feathered

Single Shoulder

Double Shoulder
