

TOP SAVER™ Table Top Rust Remover & Lubricant – all in one!

TopSaver™ is unlike anything ever made.

It is a:

- **Rust Remover**
- **Lubricant**
- **Surface Sealant**
- **Conditioner for metal surfaces**

It completely removes rust and corrosion from the pores of the metal surface. It reduces sliding friction, eliminates binding and surface hang-ups on tabletops, repels moisture and seals the surface pores against rust and corrosion.

The waterless formula contains no silicone or oils. TopSaver *will never stain wood or interfere with glues or finishes*. In early testing, Top Saver prevented rust 5 times longer than any other surface treatment and is entirely off the chart when compared to paste wax.

You simply apply TopSaver with its easy to use pump spray applicator and massage into the metal surface to remove rust and corrosion. Wipe the surface clean, then reapply and buff. Once your equipment has been treated with Top Saver this brilliant conditioner will bond itself onto the metal surface creating a lubricous deep rich finish that will reduce surface hang-ups and last for weeks or months depending upon usage.

Tabletop Rust Remover and Lubricant in One!
