

EVAPO-RUST™ REMOVER

**ENVIRONMENTALLY
FRIENDLY!**

EVAPO-RUST TRULY REMOVES,
ELIMINATES AND PREVENTS RUST!

SIMPLY SOAK THE PART FOR
1 TO 24 HOURS. ONE GALLON WILL
DE-RUST UP TO 300 LBS. OF
MODERATELY OXIDIZED STEEL.

WILL NOT HARM OR AFFECT ANY OTHER
METALS, PAINT, WOOD OR SKIN!

“The other day I met a rust remover I really liked...I decided to test the stuff on a surplus exhaust header pipe that had weathered and rusted for years in my shop while waiting for the right car to come along. I was amazed. After about an hour in the solution the header pipe looked new. I don't know of anything else that will do the job any better, and most of the rust removers I'm aware of are toxic and nasty.”

– Jim Richardson

EVAPO-RUST™

The Revolutionary Award Winning Rust Remover for the 21st Century!

A water-based, non-toxic liquid that REMOVES RUST from ferrous metals without harming surrounding materials, people or the environment. Cleaning of rust occurs by selective chelation, a natural chemical process which removes iron molecules selectively from iron oxide.

EVAPO-RUST also PREVENTS RUST when clean steel or alloy is dipped, then allowed to dry. EVAPO-RUST has won two coveted awards in 2001: named as one of the “Top 100 Inventions” by Research and Development magazine, as well as one of three awards for “Outstanding New Technology in Industrial Cleaning” by *Cleaning Technology* magazine.

Part #	Quantity
